The purpose of Project ECHO Nevada is to expand the capacity of health professionals to effectively treat chronic, common and complex health conditions in underserved populations throughout Nevada.

Project ECHO Nevada empowers primary care professionals to provide the right care, in the right place, at the right time.

**COVID-19 RESPONSE**

The Project ECHO Nevada team began working from home March 18. From April-June, we offered weekly COVID-19 Updates and planned offerings, with only one clinic cancellation. We also held 23 orientation sessions, a 109% increase over 2019.

Project ECHO Nevada offered more than 1,800 frontline providers the latest information on SARS-COV-2 testing, treatment and management through 27 sessions.

In partnership with the University of New Mexico Project ECHO, Institute for Healthcare Improvement and Agency for Health Research and Quality, we launched a Nursing Home COVID-19 series to support long-term care facilities hard-hit by the pandemic.

**CONTINUING IN 2021**

- Nutrition Education clinics for Nevada’s community health workers
- Person-Centered Dementia Care clinics for Nevada’s elder care providers
- Nursing Home COVID-19 clinics

- University of California, San Diego
- University of Nevada, Reno Extension
- UNLV School of Medicine
- VA Sierra Nevada
- Washoe County Medical Society

Report based on data from January-December 2020
Project ECHO Nevada uses telehealth consultations to connect primary care providers in rural and underserved areas to specialists, helping providers expand their knowledge base and minimizing the need for patients to travel.
