Appendix B.

**BS-MD Accelerated Pathway**

**Student Statement of Commitment to the BS-MD Accelerated Pathway Program**

The University of Nevada School of Medicine, working with undergraduate partner universities, has created the BS-MD Accelerated Pathway to train students in diverse settings and, ultimately have graduates choose to meet the needs of Nevada communities. The program also aims to keep Nevada’s highest achieving high school students in Nevada’s higher education and medical educational systems.

The BS-MD Accelerated Pathway Program provides selected students with a broad and challenging academic foundation. This program will allow for a successful transition of the students into the School of Medicine and help develop well-rounded physicians who demonstrate the necessary commitment to high quality care for all of the diverse socio-economic communities throughout the state. The University of Nevada School of Medicine and the university partners are providing a high level of support services, resources, academic and clinical experiences as an investment in this program and accepted students.

By signing below, you are affirming that by beginning the program, **you agree to attend the University of Nevada School of Medicine. Students also agree they will not apply to other medical schools as long as they are enrolled in the BS-MD program.** Signature on this agreement is an agreement between the student and the University of Nevada School of Medicine. If students meet all the program criteria, the School of Medicine is extending a conditional acceptance to the University of School of Medicine entering class, once all undergraduate requirements are verified.
