Measles, Mumps & Rubella - MMR Immunity Profile

Method: Enzyme Immunoassay (EIA)

CPT Code: 86735, 86762, 86765

Profile Includes: Measles (Rubeola) IgG Antibody
Mumps IgG Antibody
Rubella IgG Antibody

Preferred Specimen: Serum

Other Acceptable Specimens: None

Required Sample Volume: 3-5 mLs serum (3 mLs Minimum)

Specimen Container: Red Top or SST Tube, 7-10 mL

Specimen Identification: Label tube with patient’s first and last name, DOB and date/time of collection.

Special Instructions:
- Sample may be stored up to 4 days at room temperature, 7 days refrigerated at 2-8°C or frozen at -20°C or colder for up to 30 days.
- Centrifuge and remove serum from clot as soon as possible and before storing. Transfer separated serum or plasma into a labeled plastic transport tube.
- If need to store longer than 7 days, serum may be frozen at -20°C or colder.
- Do not use heat-inactivated serum

Shipping Requirements: Store and ship refrigerated at 2-8°C.

Sample Rejection Criteria:
- Hemolysis
- Lipemia
- Mislabeled/Unlabeled specimen
- Gross Bacterial Contamination
- Heat-Inactivated Serum
- Specimen quantity not sufficient

Testing Location: Quest Diagnostics Nichols Institute
San Juan Capistrano, CA 92690-6130

Turn-around-time: 5 days (M-F)
